Subject Index to Volume 4

applied economic modelling, 65
artificial intelligence, 77, 91
artificial neural networks, 237
asset and liability management, 107
associative memory, 237

balance of payments, 91
balancing, 165

causal reasoning, 135
cofactor, 285
comparative statics, 117
condensed form, 285
condition indexes, 33
condition numbers, 33
constraint logic programming, 107

data envelopment analysis, 51
decision support, 151
decision support systems, 91, 229, 261
decision theory, 201
determinant, 285
differential games, 175
disequilibrium economics, 117

econometric software, 65
economics, 91
efficiency/inefficiency analysis, 51
executive information systems, 261
executive support systems, 261
expert database systems, 151
expert systems, 1, 91, 261

facility capacity, 261
facility layout, 261
facility location, 261
facility planning, 261
fault diagnostic systems, 91
financial analysis, 77
fuzzy logic, 77

GAMS, 229
generalized least squares, 165
graph theory, 285
graphical interface, 229
group decision support systems, 261
guided-computing, 33

Hill-climbing, 15
human-computer interface technologies, 261

idea processing systems, 261
ill-conditioning, 33
inconsistencies, 165
information acquisition strategies, 201
input-output, 165
integrated environment, 65

knowledge representation, 151

linear programming, 229

macroeconomics, 1
math-programming, 303
mathematical logic and logic programming, 151
maximum likelihood estimation, 15
microcomputer application, 51
model building, 201
model representation, 229
multicriteria optimization, 237

Nash equilibrium, 175
national accounts, 165
network and telecommunications hardware and software, 261
neural network, 77
non-linear least squares, 15
nonlinear estimation, 237
numerial optimization, 303

office automation (information) systems, 261
optimal control, 175
optimization, 15

partial simulation, 117
propagation algorithm, 135

qualitative calculus, 117
qualitative reasoning, 1, 117, 135, 285
qualitative simulation, 117

rational expectations, 175
regression diagnostics, 33
risk analysis, 77
risk assessment, 107

social accounts, 165
Solow–Swan growth model, 237
Stackelberg equilibrium, 175
stock market analysis, 77
symbolic equation representation, 303

technology of management, 261
time inconsistency, 175
transportation problem, 229
travel, 151

variance-decomposition proportions, 33
